

# AERIAL FTTH DISTRIBUTION NETWORK

AERIAL DISTRIBUTION BOX IP55 144OF

## THE + BENEFITS

- + Up to 144 welds
- + 3.4 L volume for installation on aerial supports
- + **Span-Protect:** protected are dedicated zone for the storage of passing and pending modules
- + Quick to set up and guaranteed over time thanks to the E@sy'Secure® anchoring system
- + Protection index IP55

## PRESENTATION

The aerial distribution box accommodates the junction between one or more cables of an aerial FTTH distribution network.

It enables the realization of stitching, straight joint and by-pass operations, and therefore can be used as a Building transition box, a splice protection box or an aerial distribution box. It can be installed directly on a pole, or using clamps, either on a facade or a building. It can accommodate up to 144 heat-shrink sleeves protection in a reduced volume of 3,4L to allow installation on aerial supports.

All references are equipped with the Span-Protect® system, that allows the separation of the storage of the various pending modules, and protect the passing modules.

All references are also equipped with the E@sy'Secure® anchoring system, which allows cables to be fixed in only 45 seconds, for 4x greater mechanical retention than required in standard NF EN 61300-2-4. The anchoring device is included in the product, and is compatible with a very wide range of diameters.

Finally, its exterior design is similar with the ADB Distri-Protect® range, thus allowing for only one design on all the aerial connectors.

AERIAL DISTRIBUTION BOX IP55 144OF

## THE TECHNICAL AVANTAGES

**The Span-Protect system makes it possible to separate the storage of the various pending modules, while protecting the modules in transit**

- In straight joint or by-pass use, the pending modules for the incoming cables are stored in a different place from the pending modules for the outgoing cables
- In stitching, the Span-Protect system protects the modules of the cable passing through

**The E @ sy'Secure® system ensures optimum grip**

- Reduction of cable anchoring time by 10, improvement of anchoring grip by 4
- No additional parts to anchor
- Anchoring a wide range of cable diameters
- Less maintenance, the cables having no more risk of slipping and creating cuts

## MAIN CHARACTERISTICS

Characteristics	Performances	Standard of reference
Anchoring with the E@sy'Secure® system	Tensile strength : > 80 D for HDPE sheath / 10 D for LSZH sheath (Example for a HDPE cable ø15 mm, tensile strength > 1200N) Torsional strength : ± 90°	EN 61300-2-4 EN 61300-2-5
IP – IK	IP55 IK08	EN 60529 EN 61300-2-12
Closing sytem	Triangular screw + 2 siide couplings	-
Material	UV resistant Grey RAL7035	ISO 4892-2 ISO 11664-4
Fixation	By screw or lag screw on frontage (3 screw Ø 6 mm) / By bolt on omega fitting / Strip on pole	-
Compatible fiber type	Monomode G657A2	IEC 60793-2-50
Type of sleeves protection	Compatible with heat-shrink sleeves protection ø2,3 to 2,6 mm and 40 to 60 mm long	-

Dans le soucis de mieux servir ses clients et d'améliorer les performances de ses produits, OMELCOM se réserve la possibilité de modifier les présentes caractéristiques sans notification préalable

## AERIAL DISTRIBUTION BOX IP55 144OF

### SUBSCRIBERS VERSION

**Dimensions 346 x 232 x 77 mm (Vol. 3,4 L)**

**8 inputs / outputs cables**

**Capacity up to 144 welds**

### Anchor bar

- Cables  $6 \leq \varnothing \leq 16$  mm
- Cables  $6 \leq \varnothing \leq 15$  mm
- Cables  $6 \leq \varnothing \leq 11$  mm

### Span

For the references CO050 and CO052 2 spans are shipped with the product

### Tray 120F

### DELIVERY INFORMATION

Reference	Products' designation	Packing information	Palettisation
CO050	SLICE PROTECTION BOX IP55 144OF SUB. TO COMPOSE	Box of 8 pcs	Pallet of 128 pcs
CO052	SLICE PROT. BOX IP55 144OF SUB. EQUIPPED <i>Shipped with 12 trays 120F + 1 triangular key</i>	Box of 8 pcs	Pallet of 128 pcs
CO180	TRAY 12 OF G657A2	Box of pcs	-
CO015	SAFETY TRIANGULAR SCREW	Packet of 100 pcs	-
AO005	HEAT-SHRINK PROTECTION SLEEVES Ø2,3mm LENGTH 60 mm	Packet of 25, Box of 500 pcs	-
AO006	HEAT-SHRINK PROTECTION SLEEVES Ø2,3mm LENGTH 45 mm	Packet of 100, Box of 500 pcs	-

**AERIAL DISTRIBUTION BOX IP55 144OF**

## SUBSCRIBERS VERSION

**Dimensions 346 x 232 x 77 mm (Vol. 3,4 L)**

**16 cables for aerial distribution box configuration  
8 cables for slice protection box or  
building transition box configuration**

**Capacity up to 144 welds**

**IP55 | IK08**

**POLE | BUILDING | FACADE**

### Use of input / outputs ports in Aerial Distribution Box configuration

- Cables  $6 \leq \varnothing \leq 15$  mm
- Cables  $6 \leq \varnothing \leq 10$  mm
- Cables  $3,8 \leq \varnothing \leq 6,2$  mm

### Use of input/output ports in Slice Protection Box and Building Transition Box configuration

**NB :** These diagrams present two ways to use the same anchor bar. As such, the bar can also be used to achieve a mix of cables  $\varnothing$  3,8-6,2 mm and cables  $\varnothing$  6-10 mm.

Reference	Products' designation	Packing information	Pallettisation
CO051	SLICE PROTECTION BOX IP55 144OF SUB. TO COMPOSE	Box of 8 pcs	Pallet of 128 pcs
CO053	SLICE PROT. BOX IP55 144OF SUB. EQUIPPED <i>Shipped with 12 trays 12OF + 1 triangular key</i>	Box of 8 pcs	Pallet of 128 pcs
CO180	TRAY 12 OF G657A2	Box of 10 pcs	-
CO179	BIZONAL TRAY 8FO G657A2	Box of 10 pcs	-
